

REUSE REDUCE RECYCLE

Recycle! for Georgia's ENVIRONMENT

Recycling remains an important safeguard for the environment, reducing greenhouse gas emissions, limiting air and water pollution, saving energy, and conserving forests and other natural resources.

7,000 gallons of water are conserved for each ton of paper made from recycled materials

90% in energy savings is gained when aluminum products are made from recycled aluminum

Recycle! for Georgia's ECONOMY

Georgia is renowned for its plentiful markets for recovered materials. With one of the largest infrastructures in the U.S. for processing recyclables of all kinds, Georgia derives tremendous economic value from recycling.

33% of all plastic beverage containers recycled in North America are recycled in Georgia, many by the state's world-class carpet manufacturing industry

8% of all paper used in the U.S. is recycled in Georgia
15 paper mills in Georgia use recycled paper for their products

7 use 100% recycled paper

120+ Georgia businesses use recycled materials* to produce new products

23,000 Georgians are employed by these companies

6 companies in Georgia use recycled glass to make new products:
3 manufacture new bottles
3 make fiberglass insulation

Novelis, one of the world's largest aluminum recyclers, has its North American headquarters in Atlanta and recycles used beverage cans in Greensboro, Georgia
